

Blair Vullu

Software Developer | Backend & Distributed Systems

Nairobi, Kenya | tonnyblair09@gmail.com | github.com/BlairMutisya | linkedin.com/in/blair-vullu-59a829217

PROFESSIONAL SUMMARY

Software Developer specialising in Java, Spring Boot, microservices, event-driven architecture, enterprise service bus integrations, and financial systems. Experienced in taking backend services from design and implementation through release readiness and production support. A telecommunications engineering foundation brings a systems-level perspective on reliability, networks, latency, and distributed state.

EXPERIENCE

Software Developer - Eclectics International

R&D; Department | Nairobi, Kenya | Apr 2026 - Present

- Design and maintain production-grade Java and Spring Boot microservices.
- Build secure REST APIs, API gateway flows, and ESB integrations for financial-services platforms.
- Contribute across Co-Banking, RECA, Heritage Insurance, and enterprise integration delivery.
- Implement Kafka-based event workflows and own testing, deployment readiness, and production support.

Junior Software Developer - Eclectics International

R&D; Department | Nairobi, Kenya | May 2025 - Mar 2026

- Developed and secured Spring Boot microservices and REST APIs.
- Implemented service discovery, relational data models, Kafka messaging, and containerised delivery workflows.

Telecommunications Engineer - Kenya Civil Aviation Authority

JKIA & Eldoret International Airport | Sep-Dec 2021 and Aug 2022-Nov 2023

- Operated and maintained VHF/UHF, navigation, radar, transponder, and ADS-B systems supporting aviation operations.
- Supported CNS troubleshooting, documentation, maintenance, and ICAO-aligned compliance.

SELECTED DELIVERY

RECA Platform	Live enterprise platform; backend services, secure APIs, release readiness, and production support.
Heritage Insurance	Pre-launch travel and marine quotation and policy microservices with secure workflows, PDF generation, and ESB integration.
Enterprise Service Bus	Apache Camel and Kafka integration layer with routing, transformation, validation, and ISO 8583/ISO 20022 messaging.
Co-Banking Platform	Multi-tenant banking microservices with KYC, gateway security, ACID transaction workflows, discovery, and events.

TECHNICAL SKILLS

Core	Java 17+, Spring Boot, Spring Cloud, REST API design, microservices, JPA/Hibernate
Distributed Systems	Apache Kafka, Apache Camel, Eureka, API Gateway, WebSockets, event-driven design
Security & Data	Spring Security, JWT, RBAC, BCrypt, MySQL, PostgreSQL, Redis, Flyway
Delivery	Docker, CI/CD, Git/GitHub, Maven/Gradle, Linux, Agile/Scrum
Domain	Payment systems, ESB patterns, ISO 8583, ISO 20022, M-Pesa integration
Learning	Kubernetes, Spring AI, Kafka Streams, AWS, CQRS and event sourcing

ADDITIONAL PROJECTS

- Money Wallet: four-service payment system supporting P2P transfers, deposits, withdrawals, Kafka notifications, and Redis caching.
- GeoBuddy: real-time GF21 GPS tracking backend with WebSockets, OTP/JWT access, IMEI validation, and persistence.
- HRSync: role-based HR platform covering onboarding, leave, attendance, payroll, performance, and analytics.
- Nalazuri: live travel platform with package discovery, PDF invoice generation, and WhatsApp delivery.

EDUCATION

Full Stack Software Development - Moringa School

Feb 2024 - Aug 2024 | JavaScript, React, Python, Flask, MySQL, Git and Redux

Diploma, Electrical & Electronics Engineering - East African School of Aviation

Telecommunications Option | Oct 2020 - Jul 2023

Computer Applications - Skill Solve Computer College

Mar 2020 - Apr 2020

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate - Oracle, Oct 2025
- Test-Driven Development: Spring Boot, JUnit & Mockito - LinkedIn Learning, Jan 2026
- Linux, Cloud and DevOps Essentials - Coursera, Nov 2022
